TECHNICAL INFORMATION

DESCRIPTION AND APPLICATION

Synthetic lubricant for direct injection diesel engines incorporating the unitary pump injector system. Meets the requirements of a **LONG LIFE** and **FUEL ECONOMY** lubricant.

PROPERTIES

- Excellent stability of its lubricating properties even under extreme pressure and temperature conditions, providing optimal anti-wear properties specific to injection engines.
- High detergent and dispersant level, neutralizing the acids formed in the combustion of diesel and keeping carbon particles in suspension, preventing the formation of deposits in the engine.
- Allows for a reduction in fuel consumption as a result of its studied viscosity, both at high and low temperatures. Increases fuel economy and reduces emissions (FUEL ECONOMY).
- Product with optimal durability, which can significantly extend oil change intervals.
