### TECHNICAL INFORMATION

#### DESCRIPTION AND APPLICATION

**LOW SAPS** synthetic lubricant specially designed for VOLKSWAGEN Group petrol and diesel engines. Its high technology optimises the operation of post-treatment systems such as particulate filters (FAP/DPF).

#### PROPERTIES

- Its detergent and dispersant additives ensure optimum protection against wear, keeping the engine clean and avoiding the formation of sludge and deposits produced by soot at high temperatures.
- Due to its low ash content, it favours the operation of anti-pollution post-treatment systems, especially particle filters (FAP/DPF).
- It allows for extra-long oil change intervals (**Long Life**) thanks to its excellent resistance to oxidation.
